SYNTHETIC RECORD. NOT A REAL PERSON. NOT FOR CLINICAL USE.

Emergency Physician Note

Riverside University Hospital, Emergency Medicine

Patient name: Maya Ortiz
MRN: SYN-004127
Date of birth: 2004-03-22 (age 22)
Sex: Female
Document date: 2026-10-08

HISTORY

Maya Ortiz is a 22 year old woman. She sustained a head-to-head collision contesting an aerial ball during a college soccer match today. She did not lose consciousness. She recalls walking off the pitch but not the minutes immediately before the collision. She describes immediate headache, a feeling of pressure in the head, and nausea without vomiting. No seizure. No neck pain on movement initially, now reports stiffness.

PAST HISTORY

No previous concussion. No migraine. No anticoagulation. No regular medication. No known drug allergy.

EXAMINATION

GCS: 15

Alert and orientated. Cranial nerves intact. Power 5/5 throughout, normal tone and reflexes. Coordination intact. Gait steady. No focal neurological deficit. Cervical spine non-tender midline, full range of movement. No scalp haematoma or laceration.

IMPRESSION

Sport-related concussion. CT head requested. No red flag features at present: no repeated vomiting, no seizure, no focal deficit, no deteriorating consciousness.

PLAN

1. CT head without contrast.
2. Serum biomarker panel in the morning for the research protocol.
3. Ondansetron 4 mg as needed for nausea.
4. Acetaminophen 500 mg every six hours as needed for headache.
5. No return to training. Refer to Sports Medicine for graded return.
6. Written head injury advice given to patient and to the team physio.
